

Typical PC-Based U600 CNC Configuration

Integrated Industrial Technologies, Inc. specializes in customizing solutions to meet the specific needs of each customer's application. The above photo illustrates only one of the packages that have integrated our U600 PC-based CNC controller.

We meet your demands by combining our engineering services, industry expertise, application experience, and our motion products.

Regardless of how simple or how complex your projected specifications, integrating automation is never anything less than a strategic process at I²T.

Our engineers proactively identify the many possibilities that will fulfill the specific benefits that you demand. We work carefully to understand your needs, then follow a tactical implementation procedure designed to address and prove out all of the critical elements along the way.

Whether we supply your complete system or a specific segment, I²T can fully stage and test your solution at our location. The outcome is a fully functional solution that you can count on...to perform the task for which it was designed...to be executed with minimal disruption to your current operation...a project which is on-time, on-target, and on-budget.
